

Position: Manager, IT

Job Location: Kalabagan, Dhaka

Labaid Limited Diagnostics, one of the leading diagnostic healthcare service providers in Bangladesh, is looking for a dynamic, experienced, and result-oriented professional to join our IT team as Manager.

Key Responsibilities

- Lead and manage the organization's IT operations, HIS, infrastructure, and technical support team.
- Administer and maintain Servers, Active Directory, virtualization, backup, and network services.
- Manage, optimize, and secure organizational databases (SQL Server/MySQL/Oracle or equivalent).
- Lead ERP implementation, customization, integration, maintenance, and continuous improvement initiatives.
- Coordinate with internal stakeholders and vendors to ensure smooth ERP operations and timely issue resolution.
- Ensure data security, system availability, disaster recovery, and business continuity.
- Monitor system performance and recommend technology improvements aligned with business objectives.
- Lead, mentor, and develop the IT team while ensuring timely delivery of projects and support services.
- Develop and enforce IT policies, documentation, and best practices.

Educational Requirements

✓ Bachelor's degree in Computer Science & Engineering, Information Technology, or a related discipline.

✓ Master's degree will be considered an added advantage.

Experience Requirements

- Minimum 7 years of relevant experience in IT infrastructure and enterprise systems, with at least 3 years in a managerial or team leadership role.
- Hands-on experience in System Administration, Database Management, and ERP Implementation & Management is mandatory.
- Proven experience in leading IT teams and managing enterprise-wide technology projects.
- Experience in the healthcare, diagnostic, or hospital industry will be an added advantage.

Compensation & Benefits

- ☐ Salary: Negotiable
- ☐ Other benefits will be provided as per company policy.
