

We are hiring an Executive for GSE operations.

Purpose of the job:

This role is responsible for ensuring the efficient operation, maintenance, availability, and safety of all ground support equipment (GSE) used in airline operations. The role supports daily flight operations by coordinating preventive and corrective maintenance, ensuring regulatory compliance, managing equipment records, and collaborating with internal and external stakeholders to minimize operational disruptions.

Requirements

Bachelor's degree from a UGC-approved university in any discipline, preferably in engineering (Automobile / Mechanical / Electrical)

Fresh graduates are encouraged to apply.

However, candidates with a maximum of 2 years of experience can also apply.
